THE VOICE OF THE AUSTRALIAN INDEPENDENT RETAILER

MARCH 2011

**“No added hormones,  
no ifs, no buts.”**

MVD00935

There's been a lot of loose talk recently about added hormones in chicken and beef. We don't like it. Here at Steggles, we want to make one thing clear: Our chickens contain no added hormones. They're fed a healthy, balanced diet

of mixed grains including wheat, barley and sorghum. It's easy to see why Steggles chickens have been trusted and enjoyed in Australia for almost 100 years. Steggles chickens. No ifs. No buts. No added hormones.

**We're Steggles for quality**
